REVISIONS

- _____ 1. (Amended) A method to electronically publish media comprising the steps of:
- accessing an electronic data file;
 - receiving a publication instruction from a user to publish the accessed data file;
 - initializing a publication enabler capable of converting a data file into at least one publication format, wherein the publication enabler is independent of a document creation application used to create the electronic data file;
 - selecting a publication format via the publication enabler;
 - if necessary, converting the accessed data file into another publication format; and
 - publishing the data file in at least one publication format.
23. (Amended) The printer driver of claim 16 wherein the sequence of [distortions]instructions further causes the processor to route the [connected]converted data file to a supervisor and a subsequent document designate.
